

TheraCarb Inc. Co-Founder, Dr. David Bundle Recognized for Outstanding Leadership in Alberta Science

Dr. David Bundle, Co-Founder & CSO - TheraCarb Inc. (Left) proudly poses his award with Dr. Mary Earle, President & CEO - TheraCarb Inc. (Right) at the 18th annual ASTech Gala night.

(CALGARY, October 20, 2007) - TheraCarb Inc. is pleased to announce that its Co-founder and Chief Scientific Officer, Dr. David Bundle received the distinguished Alberta Science and Technology (ASTech) Leadership award for Outstanding Leadership in Alberta Science, at the 18th annual ASTech Gala on Friday, October 19, 2007, at the Hyatt Regency in Calgary, Alberta.

“The ASTech Award is a great honor for both Dr. Bundle and our research team at TheraCarb. His scientific contributions form an integral component of the company’s technology foundation. He is certainly a deserving recipient of this award.” says Dr. Mary Earle (President and CEO, TheraCarb Inc.). The purpose of these awards is to promote recognition and excellence within Alberta’s science and technology community, and these represent one of the highly deserved honors in Alberta.

Dr. Bundle co-founded TheraCarb Inc. in 2001, and later took on the role of its Chief Scientific Officer (CSO) in 2003. He has gained international recognition in the field of carbohydrate chemistry with several prestigious honors and awards to his credit. Currently, Dr Bundle is the Director of the Alberta Ingenuity Center for Carbohydrate Science (AICCS) - a discovery group comprised of highly experienced researchers, developing novel technologies in the area of carbohydrate- based therapeutics, located at the University of Alberta and the University of Calgary. He previously served as the Principal Research Officer and head of the Immunobiology Group at the Institute of Biological Science, National Research Council of Canada.
